

Project / Client:	Vivid Homes (Sales) - HA-FIRS-37419
Project Manager:	Dan Taylor
Auditor:	Penny Everett
Design Accessibility Audit date:	6-7 August 2020
Test Iteration:	1
Test Site(s):	<a href="https://yourvividhome.co.uk/">https://yourvividhome.co.uk/</a>

#	Defect Description	Level	Progress
	<p>Note:</p> <p>Every website <b>MUST</b> meet the web content accessibility guidelines at Single-A compliance and <b>SHOULD</b> meet the requirements of Double-A.</p> <p>Auditor has raised 9 main issues within this representative sample, in which this website infringes the current WCAG 2.1 guidance and, therefore, requires attention.</p>		

#	Defect Description	Level	Progress
1	<p><b>No Accessibility tools offering user selection for different contrasts between foreground and background</b></p> <p>Accessibility tools which offer the user the ability to view the page with either a high contrast or a soft contrast, is not available on this site. This is a functionality that can be provided by VerseOne designers.</p> <p>This is particularly useful for the sight impaired who may have issues with viewing a page with a low contrast between the background and the font colour. It can also assist the cognitively impaired, i.e. those users with dyslexia who find reading is made a lot easier using either a high or a soft contrast.</p> <p>When these tools are made available it helps to meet WCAG 2.0 Success Criteria 1.4.3 at Level AA. However, not offering contrast tools could lead to the page failing the required contrast ratio.</p>	Helps to meet SC 1.4.3 AA	Resolved – 14/09/2020. This function was added to the site.
2	<p><b>Carousel has no pause/Stop button</b> A Pause/Stop button should be provided.</p>	Fail SC 2.2.2 A	Resolved – 14/09/2020.
3	<p><b>Keyboard users have to go to "Cookie Policy" to close "Got it" button</b> It is a bit long-winded for keyboard users to close this button</p>	Usability	Resolved – 22/09/2020.
4	<p><b>Main menus when on pointer hover cannot be easily discerned</b> <a href="https://yourvividhome.co.uk/">https://yourvividhome.co.uk/</a></p> <p>When using the pointer for on-focus for the main menus they change to medium dark text on a dark background with a contrast ratio of 2.72:1 which fails WCAG although it is noted that it can still be discerned.</p>  <p>The screenshot shows the Vivid logo and navigation links: "Find your new home", "Already a home owner?", "What is Shared Ownership?", and "Don't miss this". The text is white on a dark purple background.</p>	Fail SC 1.4.3 A	Resolved – 14/09/2020.

#	Defect Description	Level	Progress
5	<p><b>Main menus when on-focus via keyboard navigation</b>  <a href="https://yourvividhome.co.uk/">https://yourvividhome.co.uk/</a></p> <p>Sighted keyboard users will not be able to easily discern the name of the menu currently on-focus.</p>  <p><i>Note: The drop-down menu item "Already a home owner?" is completely bypassed when using keyboard navigation.</i></p>	Fail SC 2.1.1 AA	Resolved – 14/09/2020.
6	<p><b>Contrast insufficient</b></p> <p>The contrast between the background and the price fails the success criteria. It must be at least 4.5:1 but in this case it is 3.2:1</p> 	Fail SC 1.4.3 AA	Resolved – 14/09/2020.
7	<p><b>Unable to see focus on accordions using keyboard navigation</b>  <a href="https://yourvividhome.co.uk/what-is-shared-ownership">https://yourvividhome.co.uk/what-is-shared-ownership</a></p> <p>It is not possible to know which section of the accordion is in focus when using keyboard navigation.</p> 	Fail SC 2.1.1 A	Resolved – 14/09/2020.

#	Defect Description	Level	Progress
8	<p><b>Share link is bi-passed using keyboard navigation</b>  <a href="https://yourvividhome.co.uk/developments/shinfield-meadows">https://yourvividhome.co.uk/developments/shinfield-meadows</a></p>  <p>The 'Share' button is bi-passed when using keyboard navigation.</p> <p>Additionally, there is no feedback in the way of title text with regard to opening in a new window or the file size, or format prior to clicking on both the button for 'Download Brochure' or the 'Download Price List'.</p> <p>Plus, keyboard navigators do not have focus on these buttons.</p>	<p>Fail SC 2.1.1 A</p> <p><i>and</i></p> <p>Fail SC 3.2.2 (G 201) A</p>	<p>Resolved – 14/09/2020.</p>
9	<p><b>Repeated links such as "View More"</b>  <a href="https://yourvividhome.co.uk/properties">https://yourvividhome.co.uk/properties</a></p> <p><code>&lt;a href="/developments/coudray-fields" class="btn btn-secondary btn-block btn-rounded"&gt; View More&lt;/a&gt;</code></p> <p>Auditor suggests the aria-label, or aria-labelledby, attributes could be added to these links, providing more descriptive link text to each one of these common links.</p> <p>This is specifically to help blind screen reader users who otherwise would hear:</p> <p>Link view more, link view more, link view more, link view more</p> <p>and have no idea where the link would take them.</p>		<p>Resolved – 22/09/2020.</p>
