Welcome to Harmony

think. protect. sustain.

Harmony is one of the UK's leading fire and life safety firms. At Harmony we work with our clients to manage the risks of fire and other hazards, to ensure protection of life, assets and business continuity.

Harmony provides a comprehensive consultancy, design, project delivery and maintenance strategy for a wide range of sectors giving clients a complete end-to-end solution.

Harmony has a hugely expanded focus which allows us to make better fire and security systems, as a result, which enables us to diversify. We are a research company, a product manufacturer, a training company, but above all we are a company of passionate people who love what we do.

What we will inspect

- Overall condition
- Edge condition
- Bowed or twisted?
- Leaf thickness
- Door gapes
- Overall
- Thickness
- Material
- Securely fixed and installed correctly
- Hold open device operation
- Condition
- Glass type
- Glass condition
- Appropriate signage
- Overall condition
- Size
- Smoke seal condition
- Hinge condition
- Hinge operation
- Lock/latch operation
- Architrave condition
- Door closer

We will check
the hinges are
fire rated.

We will check
the overall
condition on the
seals.

We will check to
condition of the
ironmongery

This is classed as insufficient fire stopping. Expanding foam is deadly when it burns as it emits carbon monoxide

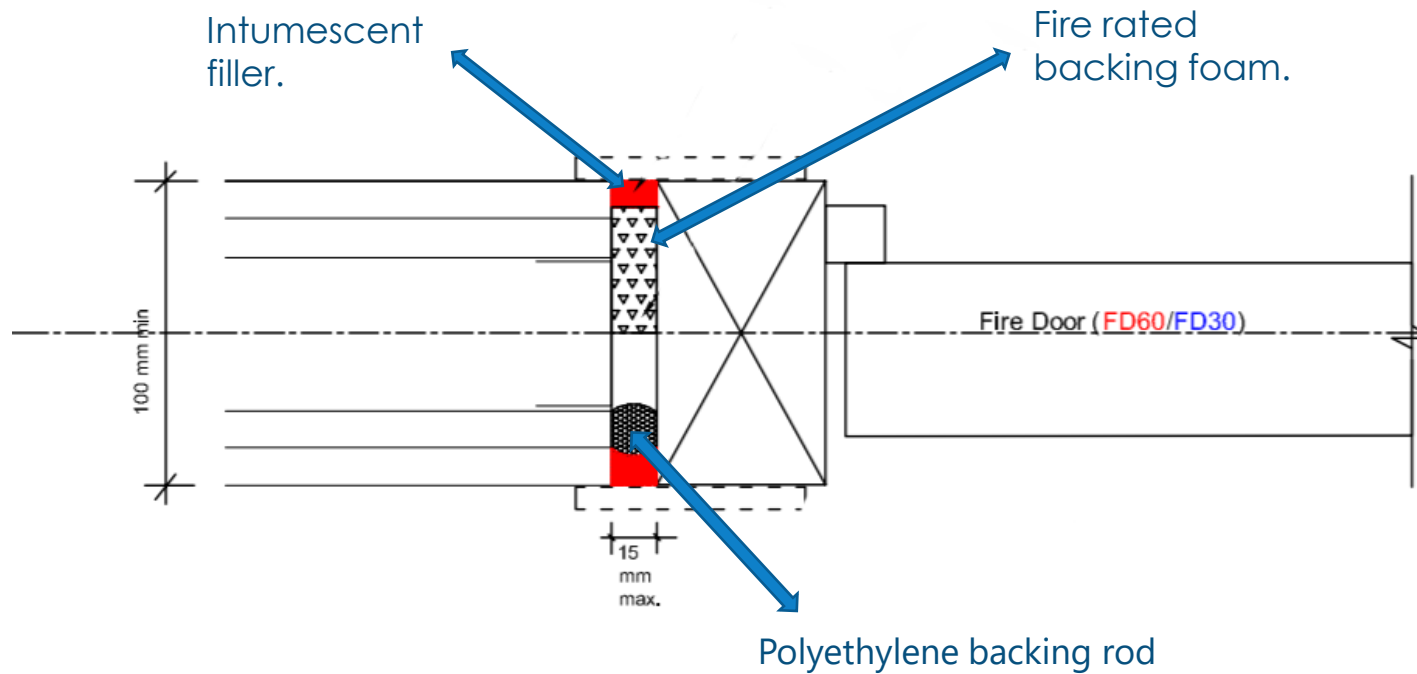

This architrave is in major disrepair and is not sufficient fire stopping.

This is how your doors will look once they are professionally fire stopped before the architrave is reinstated.

Cross section of fire door.
