Fire safety update

Pemberley Place

Fire safety update

We're pleased to share that we are now in the final stage of the Building Safety Regulator's review of our application, and we expect a response within the next couple of weeks.

Thank you for your patience. As soon as we receive an update, we'll let you know straight away and clearly outline the next steps.

If you'd like to learn more about this scheme, please visit:

<https://www.gov.uk/government/publications/cladding-safety-scheme>

Welcome to your Building and Fire Safety newsletter for Summer 2026.

Fire safety for balconies and outdoor areas

- **No barbecues or open flames:** Don't use barbecues, fire pits, or patio heaters on balconies, or outside communal areas - even small sparks can quickly cause serious fires
- **Keep balconies and outside areas clear:** Keep balconies or outside areas free of clutter, waste, and flammable items (e.g. reed screening, some outdoor furniture) to reduce fire risk and prevent spread
- **Smoke safely:** Fully extinguish cigarettes. Never throw them from balconies or windows - they can ignite fires below or in neighbouring homes
- **Plants** – Keep plants well-watered on balconies or windowsills, as dried plants are highly combustible

Need help evacuating in the event of a fire?

Part of our role is to ensure that you're able to safely evacuate your home in the event of a fire.

If this is something you're concerned about, please contact us so we can create a personal evacuation plan if needed. If you have any questions, phone us on 0800 652 0898 or email:

PersonalEvacuationPlan@vividhomes.co.uk

Fire door checks

All fire door checks are organised and assessed by Pinnacle, along with any remediation that may be required.

Fire safety must-dos

- Keep your front door and communal fire doors closed when not in use - please don't wedge them open
- Keep fire escapes free of any items, rubbish or clutter, ensure you store your possessions within your flat, or take to the bin store

Make sure you know what to do if there's a fire within Pemberley Place.

To protect yourself in the event of a fire, we need you to know what to do to keep yourself, your family, and neighbours safe, if there's a fire in your home or your block.

If there's a fire in your own home:

- Quickly get out of the room where the fire is and close the door behind you
- Tell everyone in your home that there's a fire and to get out too
- Don't stop to get any of your things and shut the front door behind you
- Don't try to put the fire out yourself
- Wait outside away from the building and call the fire service on 999 immediately

The fire strategy for your block is presently 'simultaneous evacuation' and will continue to be in place until all fire safety work has been remediated.

If there's a fire in the building (including in someone else's flat) here's what you need to do:

- Leave the building immediately
- Remember, when you dial 999 you need to ask for **fire**
- When the operator answers give the address of where the fire is, **don't hang up** until the address is repeated back to you and confirmed

If you see or hear a fire when you're in the communal area of the block:

- Leave by the nearest available exit
- Wait outside away from the building and call the fire service on 999 immediately

Going away?

If you're away this summer, keep your home fire safe.

Before you go:

- Check and test smoke and carbon monoxide alarms. If they're not working, contact us immediately. If you're a leaseholder, arrange an urgent repair

On the day you leave:

- Turn off unused electrical and gas appliances
- Turn off the main water supply - leaks can affect electrics and increase the risk of fire

Electrical safety during hot weather

- **Avoid overloading sockets:** Don't run multiple fans or portable air conditioning units from 1 socket - plug appliances directly into wall sockets where possible
- **Stay cool safely:** Close curtains or blinds during the hottest hours (12pm–7pm) to reduce heat and limit use of electrical appliances
- **Switch off when not in use:** Turn off and unplug non-essential electrical items before leaving home or going to bed

Any questions?

If you have any questions about fire safety, please phone 0800 652 0898 or email: firesafety@vividhomes.co.uk
